

Installation Instructions for the Engine Cooling Side Vents

- Each coach tends to vary from year to year and side to side, therefore, you must proceed with caution in order to mount this kit for maximum benefit.
- The included measurements are only a guide. Do not use it as an absolute pattern!

- Make sure all corners are rounded to avoid fatigue cracks.
- To receive the maximum heat removal, consider the following:
 - Mount the unit as high up as the floor will allow.
 - Mount the unit as far back to the joint line as possible. This will help prevent the formation of fatigue cracks near the edge of the wheel opening.
